# 탈레스가 제안하는 데이터 보안을 위한 통합적 접근 방식

DISCOVER

검출

민감 데이터의 검출 및 분류

PROTECT

보호

암호화 또는 토큰화를 통한 데이터 보호

CONTROL

통제

보호 중인 데이터에 대한 접근 통제 및  
암호 키와 보호 정책의 중앙 집중적 관리

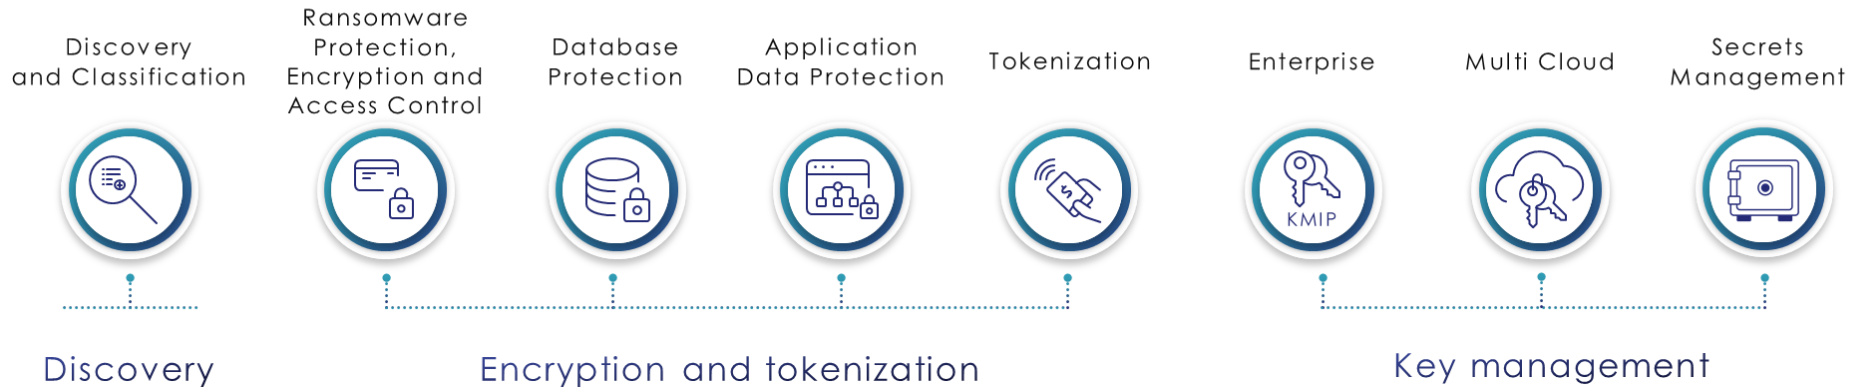

# CipherTrust Data Security Platform - CDSP

## CipherTrust Manager

암호 키 및 정책의 중앙 관리

### CipherTrust Connectors

## 랜섬웨어 공격에 대한 다각적 방어 강화

1

보호 영역에서 모든 파일 입출력을 감지하여 악성 활동에 대한 경고 또는 차단

2

랜섬웨어로 식별되는 활동 탐지 (과도한 데이터 접근 또는 유출, 무단 암호화 등 악의적 동작)

3

알려진 랜섬웨어 파일 서명 데이터베이스에 의존하지 않고 활성 프로세스를 모니터링

4

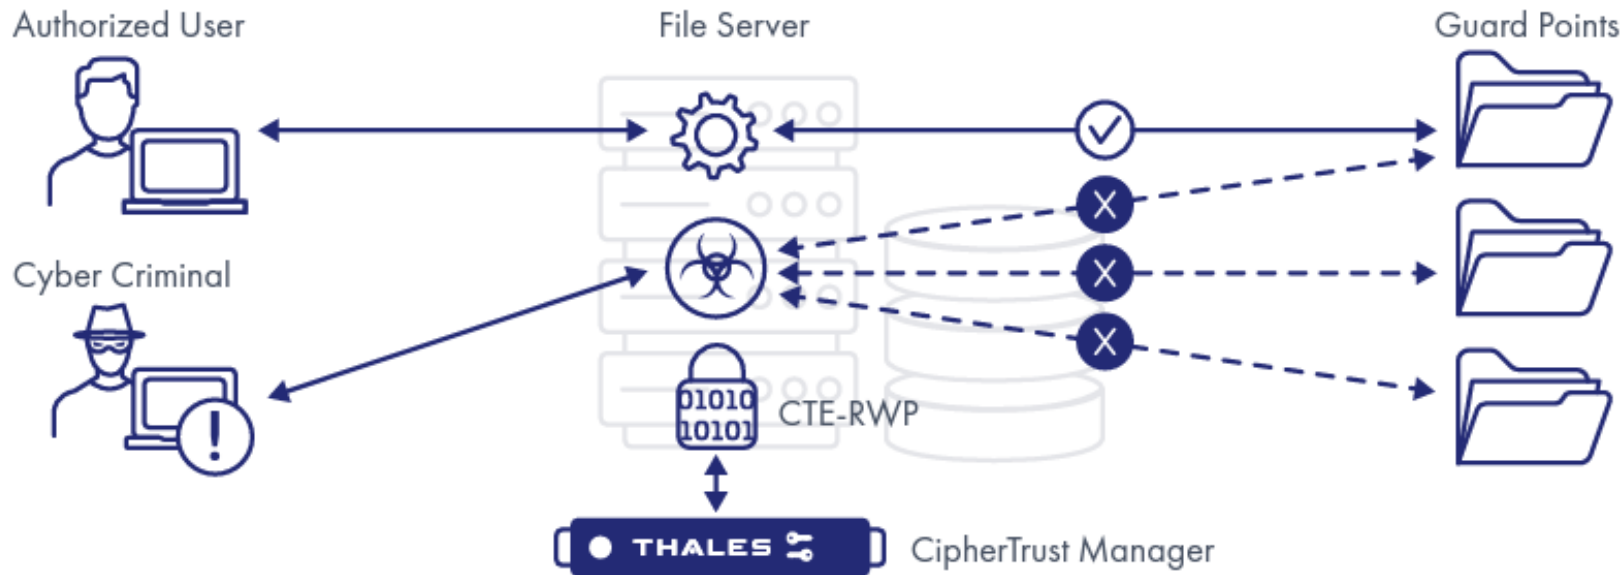

랜섬웨어가 CTE-RWP 이전에 설치된 경우에도 랜섬웨어 방어

5

통합 데이터 보안 관리를 간소화하는 CDSP 콘솔(CM)을 공유

# CTE-RWP: System IO Behavior Monitoring

악의적인 활동 탐지를 통한 랜섬웨어 공격 차단으로 보안 태세 강화

CipherTrust Transparent Encryption - Ransomware Protection (CTE-RWP)

# How Thales can help

의료 및 생명 과학 조직이 위험, 복잡성 및 비용을 줄여 디지털 혁신을 가속화할 수 있도록 지원

## 디지털 혁신의 가속화

Adopt innovations such as cloud, big data, AI, and IoMT faster with a framework for a zero-trust world

## 하이브리드 IT 환경 전반의 확장 가능한 보안 제공

Automate and streamline data and identity protection with scalable solutions for multiple use cases

## 리스크 및 복잡성 감소

Simplify privacy compliance with centralized data governance and de-identified sensitive data

# 디지털 혁신의 가속화

Digital Records and Signatures

Multi-cloud

Internet of Medical Things (IoMT)

Artificial intelligence

Big Data

제로 트러스트 세상을 위한 프레임워크로 디지털 서명, 멀티 클라우드 환경, IoMT(의료 사물 인터넷), AI, 빅 데이터와 같은 혁신을 더 빠르게 도입

**Secure** digital identities, applications, IoMT devices and cryptographic keys with a **certified root of trust**

**Protect** data in multi-cloud environments with **BYOK, HYOK, BYOE, centralized key management**

Adopt a **zero-trust** posture for all environments with **MFA**, intelligent **SSO**, and **centralized access control**

# Fortune 100대 하이브리드 IT 인프라를 위한 데이터 보안 자동화

## 클라우드 및 온프레미스 시스템에서 HIPAA 규정 준수 및 PHI 보호

### 도전 과제

A Fortune 100 organization focused on the development and delivery of drugs and healthcare products wanted to **protect sensitive data** across its **sprawling hybrid IT systems**.

Required a **fully automated, enterprise-grade** solution that could enforce security policies on a wide variety of **cloud-based** and **on-premises** platforms.

Desired a solution that would **not decrease performance** or **availability** of IT systems.

### 솔루션

**Ciphertrust Data Security Platform** to centralize the key management of applications such as **Oracle, Microsoft SQL, Nutanix, and Rubrik**, among others.

**Simplified data protection** by centrally managing **encryption keys** and **configuring security policies** and implementing **granular access controls**.

Protected sensitive encryption keys in **FIPS 140-2 Level 3** tamper-proof **HSMs**.

### 도입 결과

**Improved HIPAA compliance** posture and helped maintain **ISO 27001** and **ISO 9001** certifications with automated and **centralized data security governance**.

**Straight-forward implementation** of a highly capable solution by highly skilled account advisory team.

**High availability and performance** of solutions helped **improve resiliency** of the entire hybrid IT infrastructure.

“We were impressed by Thales's depth of **technical talent**, the **reliability** of the solution, and the **ease of implementation**.”

# 하이브리드 IT 환경 전반의 확장 가능한 보안 제공

SaaS, PaaS, IaaS services

On-premises legacy systems

File repositories and databases

External party collaboration

Remote medical devices

## 다양한 환경을 위한 확장 가능한 솔루션으로 데이터 보호의 자동화 및 간소화

**Centralize key management** for **third-party** security solutions across **cloud, hybrid** and **on-premises** environments

**Minimize** the threat of data breach by **de-identifying** all sensitive data in **all new environments and legacy platforms**, including **partners and suppliers**

**Secure access** to health records with **MFA** for all **IaaS, PaaS, SaaS**, and **on-premises** platforms.

## 레거시 시스템과 새로운 플랫폼에서 중요 데이터 보호

### 도전 과제

Pharmacy chain had to **protect sensitive data** flowing between **hundreds of locations and its headquarters**.

Data included **patient records, financial information and intellectual property**, each falling under different compliance requirements.

Constant release of new IT capabilities required that the solution be **extremely flexible and scalable**.

### 솔루션

Deployed **Ciphertrust Transparent Encryption** and **centralized key management** to protect sensitive data at rest multiple locations.

**Granular controls** allowed the precise definition of **which users are permitted access to which assets** in the network.

Enabled the **seamless protection of a dynamic infrastructure** with legacy systems and constantly changing new platforms.

### 도입 결과

**Achieved comprehensive data security coverage** across multiple locations and systems.

**Enabled continued compliance** with multiple healthcare, financial, and other regulations.

Had **no noticeable performance impact** on the systems achieving **low financial and operational overhead**.

**Ensured future scalability and growth** by enabling easy addition of security to new platforms and data stores.

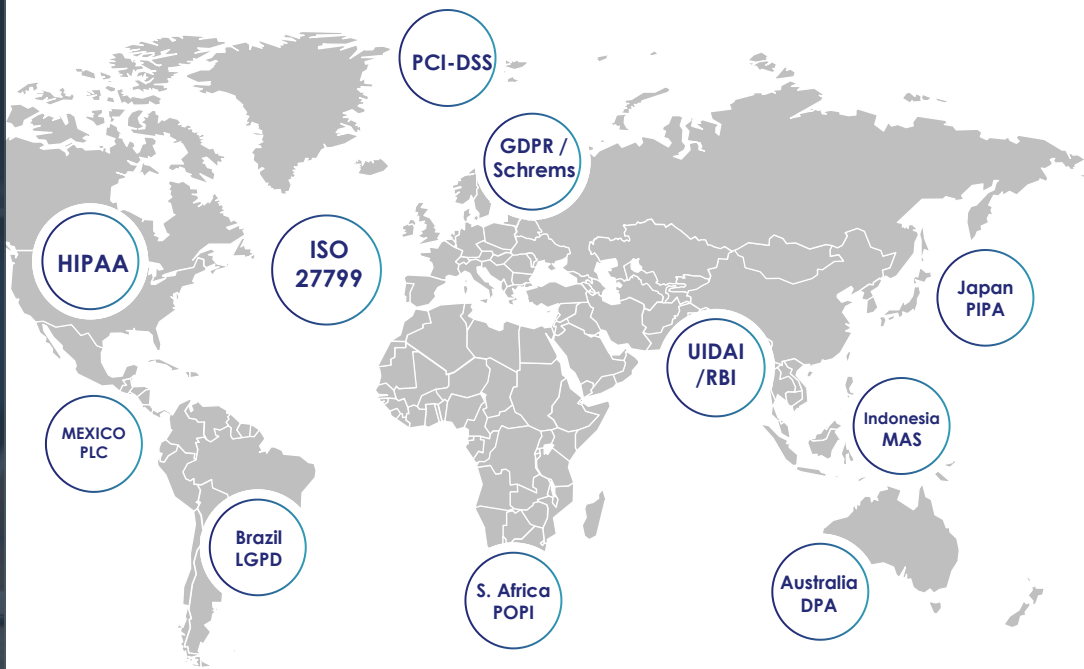

# 리스크 및 복잡성 감소

중앙 집중화된 관리 기능을 통해  
간결하게 보안 규정 준수

**Discover and classify** data across **hybrid IT** according to sensitivity to **specific** legislation requirements.

**Automate** data **protection** with **centralized** policy-based enforcement from a single pane of glass.

Apply data **privacy** and **sovereignty** rules through granular **data and access security** controls.

## 글로벌 액세스를 위한 클라우드 기반 플랫폼에서 의료 이미지 보호

### 도전 과제

**NucleusHealth** advances care through **cloud-based medical image management**, allowing global access to images by health providers.

**Required a fully automated, enterprise-grade** solution that could handle enormous amounts of data and protect from **zero day exploits, internal** and **external** intrusions, and **unauthorized access**.

Desired a **central console** to define and audit security policies across Hybrid IT for **HIPAA compliance**.

### 솔루션

**Ciphertrust Transparent Encryption** with centralized key management enabled the protection of data across multiple systems, including **Mongo DB** and **Microsoft Azure**.

**Automated data security** policy-setting, reporting, and regulatory **compliance auditing**.

Provided a **complete separation of administrative roles** with role-based access control, allowing only authorized users access to patient data.

### 도입 결과

Dramatically **improved HIPAA compliance** posture with automated and centralized data security governance.

Provided **scalability** to support **cloud-based** platforms and protect **petabytes** of data without impacting service level agreements (SLAs).

Enabled a sophisticated **cloud-based dev-ops** environment with automated reporting, **policy**-setting, and **audit** traceability while keeping data protected even from root-level access.
